CARBON BLACK

General Description

N339 Carbon Black is a reinforcing carbon black with low particle size.

The product has a high structure, which gives it easy dispersion properties, and it gives moderately high modulus while imparting excellent extrusion characteristics to rubber compounds.

It is particularly suited for tire treads that require medium to good wear resistance without high hysteresis.

Processing Features:

Its ease of dispersion makes it processing friendly. Excellent extrusion Properties.

Typical applications:

Reason for Revision: General review

Bearing and retreading tires of passenger car tires.

Truck tire re-tread.

It is also recommended for conveyors belts, solid tires, seals, moldings, hoses and other industrial rubber products requiring good abrasion resistance.

Note:

Carbon Black for Industrial Applications.

Negroven, S.A. does not endorse the use of its products in any direct application or applications that will be in contact with food, cosmetics or medicines.
